

No-No List for Bertha

Does not fit/Not recommended

Janome

- **15,000, Horizon Memory Craft 15,0000**

The sewing machine width of 23.5" is longer than the platform of the Bertha cabinet and the same width as the opening.

This lists the sewing machines that Arrow knows will are not completely compatible with the Bertha cabinet model 98700, 98701 and 98702. The opening and platform of the cabinet will accommodate sewing machines that are no larger than 22-9-16" wide, 11-3/4" front to back, and 14" tall. Please measure your machine and include knobs, plugs, etc. that extend beyond the body of machine.

The following machines fit but with issues:

Baby Lock

- Ellissimo (BLSO), Ellissimo Gold (BLSOG), Ellissimo Gold 2

The handles of the BabyLock Ellissimo are wider than the opening of the Bertha cabinet and in order to put the machine into the storage position, the handle must be upright when lowering the platform. Then the machine must be tipped forward to allow you to fold the handle down. This must be done in reverse to bring the machine up.

Bernina

- Series 7- 780, 750 QE, 710

The machines will fit the opening and platform of the cabinet but the height of the machine does not allow the top right leaf to close completely when the machine is in storage position.

Brother

- Quattro 3 Trilogy LE Innovis 6750D, Quattro 2 7600D, Quattro, NV6000D & NV6500D

The handles of the Brother Quattro are wider than the opening of the Bertha cabinet and in order to put the machine into the storage position, the handle must be upright when lowering the platform. Then the machine must be tipped forward to allow you to fold the handle down. This must be done in reserve to bring the machine up.

These machines are ones that we know have issues but there may be others especially as new models are introduced. Please measure your machine to be sure yours will fit.
