Class description	Learn how to quilt your own quilts using your single needle machine. You will learn the elements of getting a perfectly balanced stitch, how to free motion, and stipple.
Prior to Class	<ul style="list-style-type: none"> • We recommend taking the class, "Know Your Feet, Pt. 5" on May 9, prior to taking this class. • Clean, oil and put a new needle in your machine. • Become familiar with your machine. Review your manual if necessary. • If your machine does not have a drop feed dog option then bring a throat plate cover. If your machine does not have a plate, a small square of template plastic or a business card will do the trick. • Determine if your machine has a low, high or slant shank. This information is needed to purchase the machine feet listed below. • If your machine has not been serviced within a year's time, then do so prior to class. Mechanical problems with your machine can not be addressed in class, so preventive maintenance is best.
