

## ALL ABOUT the 1/4" patchwork foot

There are two 1/4" patchwork feet available—with or without a guide. Both are used with a center straight stitch and the distance from the needle to either the right edge of the foot or the guide is 1/4"—perfect for piecing quilts. Use this foot for exact 1/4"-wide topstitching too.

Both feet have markings on the sides to ensure perfect guiding all the time. The first mark in (1) at the end of each toe is 1/4". Use these marks to turn corners or sew angled pieces.

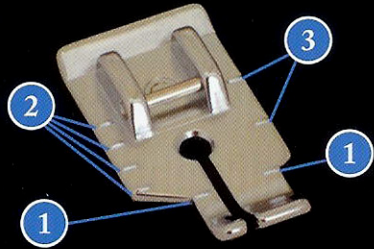

The markings located on the left side (2) are measured at 1/8" increments and the marks on the right side are at 1/4" (3). Use these marks to start, stop, or pivot when piecing, topstitching or doing general sewing.

The narrow left toe is 1/8" wide and can be used as the guide for piecing mini-quilts. Just place the fabric along the edge of the toe and sew.

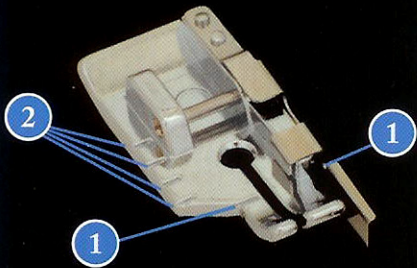

### FOOT FACTS

*Use the 1/4" patchwork foot to make exact 1/4" tucks. Simply fold and stitch—perfect tucks each time.*
