The Future of Air Purification

JUKI

Airdog is a leading air purifier company founded by a group of technology experts and entrepreneurs from Silicon Valley. Our team is passionately driven to develop innovative technologies that focus on household air purification and home comfort electronics.

Remove ultrafine particles down to
14.6 nanometer

TPA® Filtration Technology

Beyond traditional ionic technology, Airdog's patented TPA® technology is tested as the most effective clean air solution on the market. Airdog is a waste free clean air solution. The unique ionic field is proven to effectively kill and remove 99.9% of flu virus and bio-aerosols.

EFFICIENTLY REMOVE

Viruses

Fungus

Germs

Odor

JOURNEY TO CLEAN AIR

Step 5

Catalyst Filter

The final step in the purification process removes unpleasant odors keeping your air fresh and pure.

Step 4

Collecting Plate

Charged particles stick to the collecting plates to remove dangerous toxins from the air.

Step 3

Ionic Field

Annihilates bacteria and germs. Charged particles are destroyed.

Step 2

Wire Frame

Creates an Electro Field that zaps dangerous particles that would be traveling into our lungs.

Step 1

Pre-Filter Screen

Air flows from the bottom and into the Pre-Filter Screen to collect hair, pet dander, etc.

HIGHLIGHTS

Ultra-Fine Particles

Removal of ultra-fine particles down to an amazing 14.6 nanometers (0.0146 microns)! Compare Airdog to a top quality HEPA that purifies to 300 nanometers (0.3 microns). This means Airdog cleans air better up to 20X smaller than HEPA!

Waste-Free Design

Washable and reusable filters.

Easy Operation

One button operation.

Smart Mode

The front panel displays air quality index (AQI) and self-adjusts air flow rate according to the ambient AQI levels.

Quiet Operation

Optimized aerodynamic design and reduced air flow resistance.

Global Tests Validated

Airdog's performance was strictly tested and proven in authoritative test labs.

Eco-Friendly

No disposal of non-degradable HEPA filters helps save our planet.

Ozone Safe

EPA-compliant and California Air Resources Board (CARB) certified ozone safe.

DITCH THE HEPA

Imagine a world with no filter replacements...

Don't spend another dime on expensive HEPA filters that need to be replaced each month. With our reusable, easy clean collecting plates, you will save time, money, and our planet with our energy-efficient and WASTE-FREE design. Airdog is better than a HEPA! Airdog purifies down to 14.6 nanometers, versus 300 nanometers (or 0.3 microns) that HEPA collects. That means Airdog purifies 20X Smaller than HEPA! *So why would anyone buy a HEPA again?*

Airdog X5

Our flagship product, loved by customers worldwide for superior air purification.

Our revolutionary washable filter is more effective, more affordable, and better for the environment.
