

5000CJ

PROFESSIONAL STEAM IRON STATION

The 5000CJ produces 50 PSI of steam pressure and reaches temperatures up to 221°F at the tip. It's ideally suited for use in jewelry stores and work-rooms for cleaning away left over wax, plaster waste and other debris, and for polishing the final product.

Steam deodorizes and sanitizes with heat and moisture and since the only ingredient required for the 5000CJ is water, cleaning has never been safer, healthier or more environmentally friendly.
