

# 7500CD

## DENTAL LAB STEAM CLEANER

The 7500CD produces 70 PSI of steam pressure and reaches temperatures up to 221° F at the tip. It's ideally suited for use in dental labs, jewelry stores and workrooms for cleaning away left over wax, plaster waste and other debris, and for polishing the final product.

Steam deodorizes and sanitizes with heat and moisture and since the only ingredient required for the 7500CD is water, cleaning has never been safer, healthier or more environmentally friendly.
