SEBO FELIX 1 and 2 Premium and FELIX 4 Kombi

The stylish FELIX offers all the flexibility of a canister vacuum cleaner in an upright configuration! It has highly maneuverable, 180° steering ability, an ultra-modern filtration system, a detachable suction unit that becomes a hand-held vacuum, and an instant-use suction hose. The three FELIX models have different cleaning head options. The FELIX 1 Premium has a 12-inch-wide power head, the FELIX 2 Premium has a 15-inch-wide power head, and both include a parquet brush that is perfectly designed for cleaning hard floors. The FELIX 4 Kombi has only a straight-suction, 12-inch-wide Kombi Nozzle. All three models can morph into a hard-floor polisher by attaching a DISCO head. The FELIX Premium power head deep cleans carpets, or the spinning brush roller can be shut off to clean delicate rugs and hard floors with straight suction. The power head also has easy brush roller removal, and an orange warning light illuminates when brush height is set too high for optimal cleaning, the bristles are worn, or automatic shut-off occurs due to a brush obstruction.

FELIX 1 Premium

White #9808AM

FELIX 1 Premium Rosso #9809AM

Multi-surface Cleaning Capabilities – With a power head for carpets and a parquet brush for hard floors, the FELIX 1 or 2 Premium provides all the cleaning flexibility of a canister vacuum! All three FELIX models can morph into a hard-floor polisher by adding a DISCO head.

FELIX Premium Includes a Power Head, Two On-board Tools and a Parquet Brush – Along with a commercial-quality power head, a FELIX Premium comes standard with a crevice tool, upholstery nozzle and a hard-floor parquet brush.

FELIX Kombi Includes a Combination Nozzle and Two On-board Tools – The Kombi does not have a power head. Instead, it includes a combination nozzle (a straight-suction nozzle for hard floors or rugs), crevice tool and upholstery nozzle. The Kombi can accommodate a FELIX Premium power head, which can be purchased separately.

Flat-to-the-floor, 6-inch Profile – The vacuum's low profile makes cleaning under furniture and beds easy!

Instant-use Suction Hose – The integrated, instant-use suction hose is always ready! Just pull it out to clean corners, crevices or furniture. Two on-board tools and a range of attachments can be fitted to the hose, such as a 20-inch wand for cleaning hard-to-reach areas, or a nine-foot extension hose, which creates a total length of 15 feet, is perfect for cleaning stairs.

Superb Maneuverability – A unique, 180° turning power head offers superb maneuverability around and under furniture.

Protective, Rubber-coated Wheels – SEBO's wheels protect all floor surfaces and provide smooth maneuverability.

Variable Suction Control on Handle with Soft Start – The user can select the suction power needed, from curtains to carpet. And its gradual power-up extends motor life.

Three-level, Adjustable Handle – This feature provides compact storage, maneuverability when the suction unit is detached, and easy adjustment to user height requirements.

Full Bag or Clog Indicator – When a full bag, a clog in the airflow pathway, or an excessively dirty microfilter is detected, an indicator window on the bag housing lid fills with orange color and an airflow bypass valve opens, to prevent overheating and motor damage from a lack of adequate airflow.

Detachable Suction Unit Creates a Hand-held, Portable Vacuum – By removing its power head, the FELIX instantly transforms from an upright, floor vacuum into a handheld, portable vacuum, ideal for cleaning stairs, upholstery and car interiors. It can be easily carried using its alternative side handle or its shoulder-strap attachment.

Thirty-one-foot Cord with Rotating, Quick-release Hook – It is easy to quickly unwind the cord by rotating the hook!

Easy Maintenance – The clog removal door and replaceable brush roller are easy to access on the power head.

Innovative Exhaust Filter . . . Design and Functionality – Behind the stylish surface hides an ultra-modern, S-class, exhaust microfilter that not only provides excellent filtration, but it also absorbs motor noise, resulting in extremely quiet operation.

Premium Power Heads

Two Power Head Widths with One-sided Edge Cleaning – The FELIX 1 Premium model is 12 inches wide with a 10½-inch cleaning path. The FELIX 2 Premium is 15 inches wide with a 13-inch cleaning path.

Four-level, Manual Height Adjustment – The brush height can be adjusted up or down for optimal cleaning effectiveness.

Brush Obstruction Light with Automatic Brush Shut Off – If an obstruction jams the brush roller, an orange warning light on the power head illuminates and the brush roller stops spinning. This feature prevents the belt from breaking and protects the motor and carpet from damage.

Incorrect Height Setting or Worn Brush Light – When the brush height is set too high for optimal cleaning or when the brush roller should be replaced because of reaching maximum bristle wear, an orange warning light on the power head remains illuminated during use. The light shuts off when the condition is corrected.

Easy Brush Removal and Cleaning – Cleaning hair or other debris from the brush roller or replacing it when its bristles are worn is quick and easy, and no tools are required! This feature ensures consistently effective brush agitation of the carpet pile.

Manual and Automatic Brush Shut Off – The FELIX can clean delicate rugs or hard floors with straight suction because the brush roller can be manually switched off, by pressing the green illuminated on/off button located on the power head. Also, the brush roller automatically shuts off when the suction hose is removed from its housing port or when the handle is in its upright, locked position.

ADDITIONAL FEATURES:

Designed and Manufactured in Germany – Legendary quality, reliability and performance make SEBO vacuums the first choice of cleaning professionals throughout the world.

World's Best Pet Vacuums – Because of superior power-head technology, SEBO vacuums are the world's best for pet hair removal!

Excellent for Users With Allergies or Asthma – The British Allergy Foundation recommends SEBO filters.

Tightly Sealed Vacuums Ensure Effective Filtration – Dirty air, which flows through a vacuum, can only be filtered completely if it does not escape into the room through seams or seals in the machine. This is why all SEBO vacuums have tight seals throughout.

Many vacuum companies with high-filtration claims are actually quoting specifications made by the manufacturer of the filter material, as measured in the laboratory, not the filtration effectiveness of the vacuum itself while operating. Whether or not dirty air can escape through leaks in the body of the machine is not considered. The filtration effectiveness of SEBO vacuums is tested while they operate.

Reliable Commercial-grade Components – All SEBO vacuums are constructed with thick, reinforced, ABS plastic, aluminum and metal parts, steel axles and bearings and high-end, quality motors. Therefore, SEBO users own reliable, long-lasting vacuum cleaners. Competing vacuums are made with thin, flimsy, inexpensive, plastic materials, none of which are reinforced, and typically have useful lifespans of one or two years.

Save Money! SEBO Vacuums Last for Years and Extend Carpet Life! – If properly maintained, SEBO vacuums save ordinary, residential users hundreds of dollars by providing excellent performance for ten to fifteen years or more, and their deep-cleaning, power-brush technology extends the life of carpets. Typical vacuums perform poorly, even when new, and usually do not last beyond two years. So six or seven "disposable vacuums" must be purchased during the average life expectancy of just one SEBO machine.

FREE Warranty Coverage – All SEBO models include a seven-year warranty on the motor, and a five-year warranty on all non-wear parts and labor charges.

FELIX TECHNICAL DATA:

Suction Motor - 1300 Watts
Brush Motor - 175 / 200 Watts
Body Weight - 15.4 lbs.
Power Head Width - 12 in. / 15 in.
Water Lift - 90 inches
Airflow - 102 CFM
Sound Level - 68 dBA
Cord Length - 31 ft.

FELIX FILTRATION SYSTEM:

Bagged vs. Bagless . . . Bags are Better! – Top-fill, three and four-layer bags are an integral part of SEBO's filtration system because they hold virtually all dirt captured by the vacuum, which improves the effectiveness and useful life of the microfilters. They also ensure continuously strong suction because dirt enters from the top, deposits at the bottom, accumulates upward, and air exits through the sides, which allows unimpeded airflow as they fill to capacity. And they can be sealed when full, so no dust can escape into the air during bag removal and disposal.

In contrast, without bags to hold nearly all the captured dirt, the microfilters on bagless vacuums quickly clog from excessive dirt build-up and must be replaced often, or a loss of suction and cleaning effectiveness will occur. In addition, dust and other allergens become airborne when emptying bagless dirt containers. Lastly, bagless vacuum microfilters are expensive, usually costing more than a multi-year supply of SEBO filter bags.

Pre-motor Filters – Pre-motor filters clean suction air after it passes through the filter bag, but before it passes over the vacuum motor. Cooling the motor with clean air is important because this increases useful life expectancy.

S-class, Exhaust Microfilters – S-class, Exhaust Microfilters (S = "Schwebstoff" = airborne particles) are made from electrostatically charged, micro-fiber material, which attracts and captures dust particles from the airflow of the vacuum after it passes over the motor to cool it. This means that exhaust air is cleaned to the highest level. The S-class Standard requires filters to absorb greater than 99.9% of particles down to 0.3 microns in diameter. For comparison, 100 microns is the diameter of a human hair. Their advantages are a relatively open texture that allows smoother airflow for better suction performance, a longer life expectancy, and they cost less than HEPA filters.
