

All Hallows Eve Apron

You will never be too old to dress up with this fun Halloween apron. It's a boo-tiful way to prevent scary spills while cooking up spooky treats, or to feel festive while greeting trick-or-treaters.

MATERIALS

- Baby Lock Ellure Plus or embroidery machine with a 130mm x 180mm embroidery field
- Designer's Gallery Studio III installed on your computer (or CustomWorks II optional)
- Amazing Designs embroidery design pack - All Hallows Eve - ADP70J
- Black apron
- Temporary spray adhesive
- Tear Away Stabilizer
- Medium Hoop (130mm x 180mm)
- Air Erasable Fabric Marker
- Ruler
- Rotary Cutter
- Small Scissors
- All-purpose sewing thread
- Assortment of Madeira embroidery thread
- Assortment of crystals
- Crystal Applicator Wand

INSTRUCTIONS

1. At the computer: Open Studio III and browse the design collection All Hallows Eve-ADP-70J.
2. Select design AH23 and click  to send it to Studio Layout. Select the design, then, under Edit, select copy. Under Edit, select paste to make a total of six stars. Arrange the stars in a row, spacing them evenly.
3. Click Save, then Exit to send the design to Studio III.
4. Next, select design AH05 and click  to send it to ColorWorks.
5. Select and remove the colors that make up the cat portion of the design. This starts with color #6.
6. Click Save, then Exit to send this design to Studio III. With this design selected, send it to Layout.
7. Select the design, then, under Edit, select Copy. Under Edit, select Paste making a second row of fence. Arrange the fence rows so it is one continuous row of fencing.
8. Minimize Layout, taking you back to Studio III. Select design AH15 and send it to Layout. Maximize Layout and select Next to bring the design onto the design page.
9. Select the design, then, under Edit, select copy. Under Edit, select paste making a second leaf. Arrange the leaves so they fill in some of the blank space left on the fence from removing the cat.
10. Select design AH13 and click  to send it to Studio Layout. Select this design and position it so the pumpkin is sitting on the fence covering the remaining area where the cat was removed. It can be slightly on top of the leaf as well. Repeat this using design AH14.
11. Click Save, then Exit to send the design to Studio III.
12. Print templates for the designs that have been created along with design AH17.
13. Using the Air Erasable Fabric Marker and the printed templates, mark the desired placement for the designs onto the apron. Place the row of stars and the moon on the bib of the apron and the fence with the pumpkins coming out of the pocket.

Note: If your apron doesn't have a pocket, just add one using a simple fabric rectangle. Make it even more fun using a piece of Halloween print.

14. Hoop the tear-away stabilizer in the 130mm x 180mm hoop. Following the specifications for your machine; load the star design onto your machine. Spray the stabilizer with temporary spray adhesive and attach the top of the apron to the stabilizer. Use the center marks to center it in the hoop. Stitch the design, remove from the hoop and tear away the excess stabilizer.
15. Repeat for the remaining designs.
16. Embellish with crystals around the moon as desired.
